

## ACCESSORIES

# TANK WALL PLATE COVER

### KEY FEATURES

- Easy to install
- Cost-effective and elegant solution
- Safe and quick connection to the fiber optic temperature sensors
- Compatible with all our flanges
- Avoid damage to the sensors and allows precise temperature measurement

### DESCRIPTION

Optocons tank wall plate cover is specially designed for an easy and safe installation on the tank wall plate.

The sensors are protected optimally from the harsh conditions and mechanical effects, guaranteeing a precise temperature measurement.

The removable lid allows an easy installation of the sensors on the tank wall plate.

The compact size and the installation for a protective tube ensures a neat and safe connection to evaluation unit.
