

ACCESSORIES CLEANING SET

KEY FEATURES

- Fast and optimum cleaning of connectors and fiber optic thermometer
- Contained cleaning tools are not categorized as dangerous goods
- Ensures precise temperature measurement
- Illustrated cleaning instructions for easy usage
- All materials needed are included in the set

DESCRIPTION

To ensure accurate measurements and long life of our fiber optic sensors and instruments, it is necessary to clean them regularly.

Failure to do so can result in permanent damage to the connector caused by hard particles trapped between the fiber optic end faces.

Use our high quality cleaning set for thorough and efficient plug and socket cleaning.

It removes dust and dirt particles quickly and easily. We recommend regular cleaning, depending on instrument usage.

SCOPE OF SUPPLY

1 pc	Connector cleaner
4 pc	Pre-moistened cleaning wipes
4 pc	Fiber optic foam swaps
1 pc	Cleaning instructions
